

.The closing three games -Finland vs Sweden, Canada vs Finland and the USSR vs Czechosiovakia - will seal the fate of the top three places at the December 16-21 "Izvestla" ice-hockey tournament in Moscow. We will sum up the outcome in our next issue. However, we may venture here with some conclusions made by Sergei Makarov, an attacker of the Soviet national team and CAC striker, after a game between the USSR and Sweden which the hosts won 10-1 (an outcome not quite common in such bouts). He says:

the tournament as a rehearsal for the next spring world championship, due in Moscow (also on this ice) and therefore the coaches have experimented a lot. The teams have more new talenis who make no bones about their plans to come here in a few months' time. Only Canada will clearly bring a different side for the world champlonship, for the aspirants to the Olympic squad are clearly below the slandards shown by the Canadians at world cham-

Czechoslovakia, the world champions, had to be content with draws in their games against Sweden and Finland, after which they beat Canada 7-2. I assume that the change of coaches and the inclusion of several new players somehow constrained the champions' inilative. Yet the side is potentially strong in all their elements and the odds are that they will be our arch rivals this season.

Granied the Czechoslovaks are traditionally strong, the Finns provide a pleasant surprise by their aggression, the knack to contain opponents' attack and to attack in a bold combinational style. In all

EDITORIAL BOARD

Address: 16/2 Gorky SI Moster Printed at the "svestla" Press Moscow, USSR. Published Tuesday and

Index 50078.

The future inspires optimism

Sulaiman LAIQ, Minister of Nationalities and Tribes of the Democratic Republic of Afghanistan, President of the Afghan Academy of Sciences, poet

For Afghans, the first day of 1985 is a double holiday. Together with the New Year we celebrate the 20th anniversary of the establishment of the Peo-ple's Democratic Party of Afghanistan with which all the present progressive transforma-tions in the country are linked.

Evaluating the past year, said B. Laiq, I must note first of all that of great military, political and moral significance has been the routing by the units of the Aighan armed forces of counterravolutionary gangs in the area of Panjahir. This serves as confirmation that the Afghan people are able to protect their revolution.

Another happy event was the fact that seven hundred Afghan children from orphanages were sent to the Soviet Union to contimue aludies.

Their parents gave their lives

The year 1984 brought not only good news.

Indian Prime Minister Indira Gandhi, the worthy suc-cessor of Jawaharial Nehru and an outstanding stateswoman and political leader of the modern world, clied tragically. We asso-clate her name with the lofty ideals of freedom, peace, and independence of peoples. Her cause will continue to live.

The future inspires optimisa The anti-war movement will be able to prevent nuclear disaster Mankind will not allow itself to

People are mastering the serets of Nature more and more. I hope and believe that at the turn of the century, manking will use outer space exception ally for peaceful purposes. I will "work" for the wellbeing of in the struggle for the future of their native land. sun, the seas and the oceans.

Dangerous plans of the Pentagon

Now York. As is reported by the newspaper, "The New York Times", the Pentagon is prepar-ing in the near future to get down to mass brainwashing of the legislators seeking from them approval for dangerous plant for failitarization of space. In view of this the newspaper quotes a recent statement of the US Defense Secretary Caspar Weinberger who directly declared that the President does not intend to give up its "space wars" pro-

The Pentagon is accelerating the implementation of multi-thousand million research programmes aimed at creation in the near decade of a military potential in space with the help of such novelties as orbital combat stations, laser and beam weapons. As is noted by the weekly "US News and World Re-

port", out of the 26 thousand million dollars earmarked in the course of the next five years on works within the framework of the programme of "space wars", 5.5 thousand million dollars are earmarked for research in the

An important role in the plans

for militarization of space is assigned to reusable spaceships which "US News and World Report" calls "the work horses" for the implementation of the programme of "space wars". Apart from this, the United States is preparing to deploy in the near future anti-satellite weapons. As is pointed out by "US News and World Report", the tests of an anti-satellie missile launched from the F-15 fighier, are intended to be carried out next year. This missile, stresses the weekly, can be launched from any accessible air field.

ARGENTINA: FIRST YEAR OF CIVILIAN RULE

Buenos Aires Mosi political observers believe that consoli-dation of democratic freedoms is the prime achievement of the constitutional government of Argentina headed by Raut Alnsin during its first year in of-

On coming to nower the government nullified the so-cal-led black lists which existed under military regimes, reinstated by a special decree thousands of people sacked for political rea-sons, and allowed those who fied the country for fear of repres-sion to return home. Yet still

much remains to be done towards restoring genuine democ-racy. Progressive public organizations demand the dismantling of the former repressive machine which still exists, insist on knowing the truth about the fate of some 9,000 persons missing during the terrible years of military dictatorship and punishment for all those guilty of massive violations of human rights. Only a small group of generals and senior officers are being tried now while the "rank-and-file executors" continue to serve in the police and the armed forces.

Sorry, Santa, this is my small present. Drawing by Konstantin Rybalko

VIEWPOINT

UN ENTERS ITS 40th YEAR

even before World War II was over. Peoples of the planet were united by a joint struggle against nazism — the most vicious enemy of human civiliza-

Now, after four decades, they are again united by another common goal - prevention of ear war, the threat of which has become rather real and the blame for which iles at the door-steps of the USA. Mankind faces the questions to be or not to be. This was the major issue before the 39th session of the UN General Assembly which confinued for three months.

Thanks to new Soviet Initiatives the Assembly's agenda was strengthened by two important and urgent issues: the for peaceful purposes and the right of peoples to determine their own fate, which draw a rebulf to the policy of state ter-corism. Both these initiatives received the approval and supporf of the world community. Virtually unanimously the as-

sembly supported the Soviet view that a solution to the prob-lem of non-militarization of out-er space is of primary import-ance so far as the prevention of nuclear war and checking the arms race are concerned. The main direction of the Soviet proposal on using outer space for the benefit of manking re-Asi ib 169 tion which was supported by practically all states with the exception of the USA.

The discussion at the UN forum of the two new Soviet ini-tiatives and adoption of resolu-tions on them helped achieve substantive results also in other directions of the struggle for elimination of the nuclear war threat and the charling of specific routes to a safer world. The session recommended that siales, primarily nuclear powers, formulate their policies in line with this most urgent task of to-

The world community again called on the USA and its ailles to undertake not to be the first to use nuclear weapons! CriticVillus KAVALIAUSKAS

ism was voiced against Penta-gon's doctrine of "intimidation" and "limited nuclear wariare".

The UN decisively supported the creation of nuclear-free zones in various parts of the globe, the strengthening of the treaty of non-proliferation of nuclear weapons, and (avoured mament, which would ultimately lead to a complete liquidation of nuclear weapons.

On the whole the session adopted over 60 resolutions calling on states, nuclear pow-ers in particular, to facilitate, through a reduction in the burden of armaments, especially space and nuclear armament.
These decisions were supported by the overwhelming majority of states. Only the USA and a group of its ailies voted against 26 of them. America also cast ione votes against fen other re-

On the whole the session demonstrated that the policy of peace and cooperation has a firm and solid foundation at the UN. The consolidation and ex-

pansion of the interaction of the socialist community and non-aligned nations continued.

Though not all the resolutions of the session like, say, the re-solutions on the so-called Af-ghan and Kampuchean Issues, answer the demands of political realism, on the whole, however, the assessment of its work is positive. It indicates that the forces of mankind's self-preservalion are more powerful than the force of nuclear adventurism. The session gave an unequivocal affirmative answer to the main question of today: a world nuclear conflagration can be avoided.

One more peculiarity of the session was that many delegates talked of the need, to improve Soviet-American relations. They halled the intention of the Soviet Government to hold a serious and constructive dialogue with the USA.

Having ended this session, the UN enters the 40th year of lis existence. In one of the resoluexistence. In one of the resolu-tions the delegates declared May 8 and 9, 1985 celebration days of the 40th enviversary of victory over nazism in World War II. This double jubilee, as stressed by the UN Secretary-General Javier Peres de Cuellar, will once again remind the mombers of the noble princip-les and goals of the UN and the need to strictly observe and respect its Charler.

MAJOR VICTORY

The tesolution of the UN General Assembly to hold an international conference in Colombo in the litst half of 1986 to work out an agreement on creating a peace zone in the indian Ocean, is commented on in PRAVDA by Y. Nikolayev,

The adoption of the resolution, notes the author, was preceded by an acute political struggle between the sponsors of a peace zone in the Indian Ocean — non-aligned countries actively backed by the states of the socialist community, on one hand, and its opponents — the USA and other imperialist states pursuing a policy aimed at the further militarization of that vast region, on the other.

The adopted resolution, the author believes, creates realistic opportunities for turning the Indian Ocean from a region of lension into a zone of peace. The implementation of their initialives will depend on the determination, steadiantness and consistency of non-nigned countries, as their vital interests demand it. As for the Soviet Union and other socialist countries, they have rendered and will continue to render

'NIGHT HUNTERS' ON THE APOCALYPTIC

The activities of the 100th operative group stationed at fort Campbell, Kentucky, USA, a unit which forms part of the 101 dirborne division, represent direct sints (errorism, This conclusion is made by IZVESTIA's correspondent in Washington A. Palladin.

The group whose strength is that of about a battalion consists of seizer helicopter men. It is subordinated not to the divisional commander, as it should by rights, but to General Rice, Chief of special operations section of the Joint Chiefs of Stall. Its servicemen are known as "night hunters", and their motio is "Death Awaits in the Dark". As is customary in the US Army they have their own coat of arms — a horse-man riding a winged horse holding raised sword in his hand. However, the horse is not Pegosus who accompanies all poets, but a sinister horse from Apocalypse from the New Testament.

The choice of the symbol is not accidental. Like thieves at night, the servicemen of the 160th group sow death in other countries, trusting the Pentagon sword into the backs of un-conquered peoples, stresses the author.

USA: MILITARIZATION OF THE ECONOMY

There is a lingrant discrepancy between the peaceful promises during the election compaign and the decils of the Re-publican administration in the USA, writes in KRASNAYA ZVEZDA N. Karasyov, Candidate of Sciences (Economics).

The author notes that the 1985 Pentagon budget of almost 300,000 million dollars will increase to 313,700 million dollars in 1986 and to 362,600 million in 1987, to reach the stupendous sum of 411,500 million dollars in the 1988 liscal

Under the Reagon administration, the author points out, major redistributions of capital investments within the company are taking place in layour of producing arms and military hardware. For example, the bosses of McDonnell Douglas raised their military investments from 29 per cent in 1983 to 47 per cent in 1983. In Boeing this figure is respectively from 15 to 36, in General Dynamics, from 19 to 41, in United Technologies — from 31.5 to 63.5, in Rockwell International, from 26 to 52, and Lockheed from 43.5 to 93 per cent.

THE WEST AND HUNGER IN AFRICA

Speaking at a press conference arranged at the UN headspeaking at a press converence arranged at the Livined and quarters, Berhanu Detesse, deputy commissioner of the commission for aid and reconstruction, expressed profound thanks to the Soviet Government and the people for disinterested and timely aid rendered to the Bihiopian population in overcoming the grave consequences of the protracted drought, writes G. Polyakov in SOVIETSKAYA ROSSIYA.

At the same time, notes the author, a misinformation campaign was founched in the West, aimed at discrediting the Bilioplan Government in the eyes of the world public, treating with distrust cooperation of Bihiopla with socialist countries. The US press succeeds especially in this bollyhoo. The West is trying to present oil this as if it shows greater concern for the victims than the Bihioplan Government and the socialist countries irlendly to Bihioplan This trick, notes the author, is used so as to take advantage of economic difficulties. In Bihiopla to exert pressure on her government. It is this policy that was adopted with regard to Mazambique, Zambia, Zimbabwe, Tanzania, Madagascar, Angola, Burkina-Faso, Benin and other states that suitered from the drought,

A FRESH SUCCESS HAS BEEN SCORED BY THE BUILDERS OF THE MAIN GAS PIPELINE URENGOI - CENTRE-2 WHO HAVE LAID THE 2,5001h KILO-METRE OF THE PIPELINE, The pipeline Urengol--Centre-2 is the sixth and the last line plann-ed to be built under the Five-Year Plan [1981-1985] from Western Siberia.

Church calendars

The publishing house of the Moscow Patriarchy has issued a 1985 calendar of the Orthodox Church. This calendar continues the systematic publication of articles on religious and historic themes in view of the forthcoming celebrations of the millennium of Russia's christening. The celebrations will be sponsored by the Russian Orthodox Church and are scheduled for 1988.

The opening article takes us back to the end of the 13th and

early 14th centuries, when the Importance of Moscow Principality began to increase. That was during the reign of Prince Da-niii of Moscow (1261-1303). The article also describes the famous people of that time.

The calendar includes a list of

memorable days and anniversaries, as well as religious events and Easter weeks during the period between 1985-2005.

Such calendars are issued every year by all churches and religious associations in the Soviet Union.

FROM the SOVIET PRESS

SCIENCE AND TECHNOLOGY'S CONTRIBUTION TO NATIONAL ECONOMY

PRAVDA willes that 1984 was rather remarkable for its scientific successes in virtually all industries. It has yielded up almost 4,000 new types of machines, equipment, instruments, devices and automatic facilities. Being introduced are new mechanized and automated production lines, tobolia complexes, computer process control systems, more capable devices, etc.

The newspaper stresses that the 1985 USSR plan for roclo-economic development is also targeted at ensuring last growth rates for science and technology.

More products and materials will be introduc

ing considerably higher cost-to-performance par ters. Saving of resources will be facilitated by a broader use of continuous sicel pouring, dry cement production, comprehensive oil and gas processing, total utilization of raw materials. Numerical control and robots will be used on a broader scale for automation, hoisting of Izeight, running of warehouses, etc. Process and other dor controls will be introduced very dynamically. This drive will enable the country to mechanize 400 thousand jobs. Fundamental studies will be developed as before—to provide a foundation for the 12th Five-Year Plan and for a longer perspective,

LAND FARMING: RESULTS AND PERSPECTIVES

People said not so long ago that a century is a very short period for farming. Now, in the eighties every year is either a landmark or at least a critical point or making. 1984 was no exception, IZVESTIA writes. It was a hard year for farmers, remarkable for its lengthy and wide-ranging droughl, yet the 1984 gross agricultural produce is expected to grow by

10 thousand million roubles over the annual average for the tenth five-year plan period (1970-1980). Except Uzbekistan, all the Union republics have sold the state more meal, milk and eggs than last year.

Large-scale capital investments, accelerating scientilia and technical progress provide an excellent ground for unorthodox approaches to the larming industry, including the programmability of high yields.

One of the main practical steps in this direction is the introduction of industrial processes into the farming of winter and spring wheat ensuring high quality grain. Thanks to these novelties, the country expects to additionally harvest 16 to 18 million tonness of crops in 1985. Industrial processes are to be applied to 40 million hactores nationwide, to begin with. The Ministry of Agriculture and the All-Union Agricultural Academy regard this as a patient to be consequent. regard this as a radical step towards the model of reliable crop farming in the country

NUCLEAR ENERGY A PRIORITY

A live per cent more electric energy was produced over 11 months of the current year than it was initially planned, writes TRUD, Nuclear energy plays a major tole in this achievement. Therefore this industry is given priority treatment for quite a long period.

Aiready now nuclear stations are quite noticeable in the economy. They save over 30 million tennes of organic fuels and drastically reduce transportation costs. Nuclear stations now produce 100,000 million kW-hrs a year, or as much as all the country's energy sources produced in 1951,

The 4-million kilowatt Chernobylskaya and Leningradskaya stations are true giants in the world of nuclear energy. The nuclear stations in Smolensk, Royno, Kola Peninsula and other places will soon be expanded. The task is to achieve all energy growth in the European section of the country through nuclear energy alone. The organic fuels thus saved will be set aside for other industries.

WHAT WILL OUR GRANDCHILDREN BE LIKE?

Pediatrists have long been worried by the loci that despite the improving living standards of the Soviet people, the indisputable victories scored by Soviet medicine and the huge funds spent by the state on the development of physical culture and sport, the health and level of physical training of the rising generation leave much to be desired, Academician Mitroian Studentkin, Director of the Institute of Pediatrics of the USSR Academy of Medical Sciences, writes in LITERATURNAYA GAZETA. TURNAYA GAZETA.

One of the reasons is insufficient mobility. This has a negative effect on literally all the organs and systems Iл a human body.

In order to combat this deliciency it is necessary to Create conditions that would D This must be done side by side with a strict willist of the correct regimen during the day and a correct dict.

This must also be done from the day a child is born.

Aghicum Later Control of the day a child is born. Academician Studenikin points out. Children who lake up physical training regularly are not only resolute the lake and articles and articles. The control of the lake and articles are more independent, resolute and articles. and quick-witted as well.

Unioriumalely, not all parents understand how i portant this is. Therefore, the Academician says, it is probably necessary to introduce such a thing as annual tests to a such a such a such a such as the such as tests for children of all age-groups (excluding those who are ill, of course) when they enter school or any other educational establishment. This will radically charge their parents' attitude to physical training.

their parents' attitude to physical training.

The Institute has worked out concrete recommender that the Institute has worked out concrete recommender that the Institute has worked out concrete medical physical activity). We have also organized medical physical outlets, which has an equally times they are too intensive, which has an equally times they are too intensive, which has an equally negative effect on the health of children. Besides, to negative effect on the health of children of other countries, gether with scientists in a number of other countries, we are working out optimal physical education norms and methods for children of all ages.

for visitors to the USSR

you are going to visit the Soviet Union on a business or a tourist ip, you may need information on banking services rendered to reign citizens in the USSR. Please note that on the territory of the USSR all deals with foreign currency should be effected only through the Bank for Foreign Trade of the USSR or authorized offices of the State Bank of the USSR,

of the USSR or authorized offices of the State Bank of the USSR, otherwise these deals are considered illegal.

You may import into the USSR any foreign currency and payment documents in foreign currency on the sole condition of registering the cash currency in the customs declaration which, as well as the receipt given to you when the currency is exchanged into roubles, will be necessary to you for the exchange of the unspent roubles and the export of unused currency. Please note that the import and export of Soviet roubles are prohibited by law.

Foreign currency and payment documents may be exchanged into

port of Soviet roubles are prohibited by law.

Foreign currency and payment documents may be exchanged into Soviet roubles at the exchange offices of the Bank for Foreign Trade of the USSR and the State Bank of the USSR, located practically in all cities and towns of the Soviet Union visited by foreign tourists. Foreign exchange quotations of the State Bank of the USSR available at each exchange office may be used for verifying the correctness of the transaction.

If you wish, you may use foreign currency for effecting payments—there are special stores in our country which sell for foreign currency, bars and restaurants of Intourist.

However, in our opinion, travellers' cheques of the Bank for Foreign Trade of the USSR in roubles with free conversion are the most convenient means of payment for our foreign guests. These chaques will spare your time and money, as on the territory of the USSR they are paid free of commission, unlike travellers' cheques of other banks.

Apart from purchase and sale of foreign currency and payment documents in foreign currency, banking offices of the USSR (the Bank for Foreign Trade of the USSR and the State Bank of the USSR). accept funds in foreign currency to current accounts and into deposits, transfer funds abroad by orders of their clients and effect other banking operations,
At the salon of the Administration for Commercial Operations of

At the salon of the Administration for Commercial Operations of the Bank for Foreign Trade of the USSR (Moscow, 9 Pushkinskaya Street) you can purchase for hard currency bank goods — gold in ingots and nuggets, jubiles and souvenir medals made, of precious metals, and also numismatic items.

We hope this information will help you in your journey around the Soviet Union where the Bank for Foreign Trade of the USSR and the State Bank of the USSR are always at your service.

Bank for Foreign Trade of the USSR 37 Diyambolikha Street, Moscow.

VIEWPOINT

THE PRESENTS IN FATHER

Irina KHUTSISHVILI

The time of Father Frost has come. The most famous among them stands by the most popular Soviet New Year tree in the Kremlin Palace of Congres-ses. The tradition is that at night, when all the eight mil-lion people in Moscow go to bed, a Falher Frost "cerries" a tall fluffy beautiful fir tree smelling of frost and forest to the Palaco, "plants" it to the marble-and-glass foyer, deco-rates it with bright toys, gar-lands of multicoloured boads, and electric bulbs, and scatters presents underneath the tree. He then invites joylal actors and young guests to a New Year party. And the time of dances

and exciting games begins! Such functions take place throughout the country, in all concert halls, assembly halls of schools and universities, theatres, palaces and houses of culture and clubs. New Year trees are decorated at squares of towns and villages, in parks and yerds, at stadiums and skating yerds, at stadiums and skating rings, in window shops and certoinly, in almost all the flats. Farther Frost attend festivals in trains, sail in boats, board planes, and travel by belicopter to mountainous places. They are seen in the cindeer-drawn sledges in the Far North and, of course, in Russian troikes in places where the ground is covered with snow. More and more Father Frosts are coming with their magic sacks. What do these sacks contain this year? Toys and sweets for children. For grounting 1085, the tast year of grown-ups 1985, the last year of the current eleventh five-year

There have been increases in wages and salaries paid to industrial and office workers, as well as collective farmers. More money will be spent from social consumption funds on various benefits, including free medical services, education, pensions, scholarships, sick leaves and vacations, etc. in 1985, the social consumption funds will grow by five per cent and will reach 146.5 thousand million roubles. This is 2.5 thousand million roubles more than the amount envisaged in the final year of the five-year plan. Due attention is devoted to bringing up the younger generation, and to improvements in the vocato improvements in the voca-tional training of the young-New schools, creckes, kinder-gartens and vocational and tech-nical schools will be opened. The number of outpatients' cli-nics, medical posts and hospitals will increase to enable Soviet health services to get closer to their goal of disease prevention. Slightly less than 103 million

plan, means further growth of living standards and real in-

square meires of new housing will be built in 1985. In all, 144 million metres of housing is be built next year. During the 11th five-year plan period 1981-1985 nearly 555 million square metres of housing is to be commissioned. More than fifty million people will improve their living conditions.

What gives us confidence that these plans are realistic. It is the continuous growth of the Soviet economy which knows ho creast. There is work for everye bull next you

crises. There is work for every one, and memployment is long forgotten since animm 1930. All this will enable the Soviet peo-ple to formulate new plans and great the new year confidently.

AND THE YEAR 3000...

Lyudmila Zykina, People's Artist of the

I returned recently from Denmark where I gave guest performances and was very pleased to learn that people in the homeland of Hans Christian Andersen know and love Russian towns of our country. I especially will remember the trips to the birthplaces of Lermontov and Tyutchev. It seemed that, songs, too, sounded there dif-ferently — more heartily and more beautiful. Real beauty is always good however it is expressed - either in poetry, art or music. The language of art is understandable to all, and in this language one should talk of love and peace.

I remember one episode when I performed in Melbourne for

(Continued from page 1)

atre performances other surprises await the visitors, particularly New Year parties with Father Frost and Snow Malden, There

will be various folklore groups to entertain them with Russian

folk songs and dances. Specially

to be arranged for the foreigners

will be rides on troiks and rein-

deer-driven sledges in the Bota-

'RUSSIAN WINTER'

ARTS FESTIVAL

the first time. I came on to the stage and looked at the audience... Ladies in furs, men in dinner suits. I sang the song about "Ryazan Madonnas" and thought: will they understand without knowing Russian, without seeing this terrible war we experienced but from which Australia was far delached? And, suddenly, there were handkerchiefs here and there. The audience wept... Later, after the concert, they ques-tioned me for a long time about the war and Russia... It is very important that people commu-nicate because it is from com-

munication that mutual under-

standing comes.

I know about the past war not from stories. At 14 I went to work at a factory for the front. Often the workers-mostly women and teenagers be-cause men were fighting—spent nights in the workshop, they could not walk home because of exhaustion. But we are proud that we made our own contribution, though small, to the great cause of Victory. Its 40th anniversary is approaching. And on the eve of this glorious date I appeal to all the neople on this planet not to forget for one moment that peace is in their hands. If every one remominers that there is hope that people of the Earth will

1985 but also in the year 2000

Moscow played host to wellknown Japanese impresario Yasuo Nakato, the head of the Japan Aris concert firm estab-lished 13 years ago.

Over the years the firm con-tributed considerably to the development of cultural links between Japan and the Soviet Union as well as other socialist countries. Yasuo Nakato discusses the firm's activities:

The firm has promoted performances in Japan of many brilliant representatives of the Soviet musical art, among them lots of young but widely recognized ones like pianists Pletnyov and Gavrilov, violinist Splvakov and, certainly, outstanding and world-famous mas-ters like Svyatoslav Richter, Emil Cilels and many others.

Guest performances of Soviet musicians invariably enjoy trenendous success in Japan, In 1983 our firm organized a fes-tival of Russian and Soviet arts. It was a great success so we decided to hold a similar festival in 1986. This is what I have come here to discuss.

In 1985 we expect another visit from Mikhail Pletnyov and Yevgeny Nesterenko.

I believe in a fruitful future of cultural exchange between our two countries because this is not just a matter of coopera-tion but an important step to-

very great in Argentina. Guest performances of such world-fam-ous dancers as Galina Ulanova The guest performances of the Bolshoi Ballet dancers Lyudmila and Maya Pliselskaya, Yekaterina Semenyaka and Valery Anisimov Maximova and Vladimir Vasilyev have left an indelible impression at one of the worki's biggest theatres "Colon" in Buenos Ballet fans follow all press re-

Mitchell Ford.

Chairman of the Board of the American firm Embart:

long ago, at the State Committee for Science and Technology in Moscow, we algued a protocol on extending for another five years the agreements on scientific and technical cooperation. Our business contacts are developing mainly in the production of plastics, glass rallway cars. However, the possibilities of expanding busisiderable growth in the produc-tion of consumer goods Emhait offers its know-how in the shoemaking industry. Emhart's Soviet sales amount

hausted. Taking into consideration the Soviet plans of con-

ed to about six million dollars in 1984 and can at least be doubled - for the company bar been doing business with the

Hanz Salzwedel,

Director of the Moscow Office of the West German firm Klockner-Hum-

boldt Deutz (KHD) A. G.:

Quite a lot of equipment with the KHD trade-mark, mainly

air-cooled engines, already operate all over the Soviet Union. More than 16,000 different machines are already fitted with them. Perhaps, Muscovites too have seen transport equipment

Contacts and contracts

 A plan for the delivery of goods to the USSR has been fulfilled by the TOS mechine-building fectory in Kutim, Czechoslovakia. The USSR is the pale importer of that country's main importer of that country's numerically controlled machine processing centres and autome-tic production lines. This year the Kutim machine-builders delivered to the Soviet Union's automobile-tractor repair sta-tions the first consignment of tool-milling machines.

© The nickel complex in Pun-te Gorde, the Province of Hol-guin, built in Cube with Soviet assistance is to be commissionassistance is to be commissioned in December next year, With the commissioning of the complex, development will start of richest deposits of laterite ores in the area of the fown of Moa, which will turn the esstern part of the Province of Holguin Into a centre for the Cuban mining industry. The glant of the metallurgical industry in Punta Gorda will produce nearly thirty thousand lonnes of nicket cobalf concentrate a year. with our trade-mark. It can be seen most frequently on the projects of the Tyumen Region, Siberia and BAM. By the way, I have had the occasion to be there and I was pleased to see with my own eyes the stupendous plans and accomplishments of Soviet people.

I am pleased to realize that we too somehow contribute to this work of great importance.
The first contract between the
KHD and Soviet partners was
signed more than 50 years ago.
Since then we have been cooperating not only in trade, but also in scientific and tech-nical sphere. In essence, our contracts are long term and are meant for many years.
Let's take, for example, the

engine works in Kustanai, Kazakhatan. The producilon of engines, developed by KHD, to start already in 1985, will undoubtedly become one of the major events of the new year. If we say that the turnover

of our firm on the Soviet mar-ket almost doubled in 1984 compared with the previous year it will be a mere state-ment of the fact. But I would like to mention that contacts have become closer and more laid for future major mutually advantageous contracts. We are developing new engines, seriously orientating ourselves to-wards the conditions under which they are supposed to operate at the leading industriil and construction projects of the Soviet Union.

I shall calebrate the New Year for the second time in Moscow. Naturally, everyone is homesick. Nevertheless, I am glad of the opportunity to mark this holiday together with my soli dear to my heart. I wish them success in carrying out all their plans and good health. And, of course, I wish peace needed by each of us alike.

NO LIMIT RECORDS

Sergel Bubka, world pole-vault record holder and champion, for the first time named the best Soviet sportsman of the year:

I am happy with the recognition my sports achievements have won. On the eve of the New Year apparently everyone pondors over what was done in the passing years and plans for the future, I also have a chorished wish: I dream of conquering the six-metro height. I am sure there is no limit to records in aport. They say that I am a maximalist. But how can it be otherwise? To achieve high records one should aim high. But goals may only be realized if there is peace on earth.

Only peace and understanding among peoples can help over-come difficulties which exist today in the Olympic movement. Outside the Olympic movement, international sport and friendship between sportsmen of various countries cannot freely and comprehensively develop, noither can there he sport meets that make competitions lively and

yield high results. I want to please sports (ans with good performances, wins

are many wishes and I have not yet sold that I married in autumn and an additional memfamily and that many of plans are connected with the course at and records.

I wish that representatives of athletics, which is justly termed

Culture. I think that dreams, plans and hopes can be realized. I also wish all my relatives, friends and numerous sports fans

As a country of the country of the country of the country of High records in downhill

The women's World cap downhill, held in Santa Caterina (Italy) shortly before the Christmas and New Year vacations, brought a triple success to Austria. The top three fini-shers Elisabeth Kirchter, Veronika Vizthom and Katrin Gutensulm came far ahead of Clympic champion Michele Figini of Switzerland.

After the 1984 stages (the "Crystal Globe" will resume next year), the "race" is led by Ma-

rina Kichl of West Germany with 80 points. Trailing her but still for ahead of the pack is Kirchler with 70 points. Erika Hess of Switzerland has 59 po-

Earlier, the men's ovent was cancelled in Bormio, Italy (where, incidentally, next year's world Alpine skiing championship will be held). So still leading are Pirmin Zurbriggen of Switzerland (104 points) and Mark Girardel-li of Luxembourg (95 points).

Trud wins European Cup

We have reported that the contesting sides in the final match of the tournament for Europe's best chess team were two Soviet teams representing the Trud and Burevestnik sport clubs. The Cup has been won by Trud (for the third time) after playing two tounds on six chess boards.

The greatest contribution to Trud's success was made by Alexander Belyavsky who re-cently led the USSR national Chess Olympiad in Saloniki, Greece. On two occasions Be-lyavsky descated the twice USSR champion Lev Psakhis.

The men's world chess champlonship resumed on Wednesday, December 26 after a week-long break. On that day, Analoly Karpov and Garri Kasparov played the thirty-fifth gome after which the score was still 5-1 in favour of the thrice world champion as the contestants agreed on another draw.

ATHLETES OF THE YEAR

Sarajevo Olympics figure-skating champion Katarina Witt and javelin record holder Uwe Hohn were voted GDR athletes of the year in an annual survey carried out by the youth paper "Jungo Welt".

. . . World high-jump record hold-er Lyudmila Andonova was

RINAT DASAYEV named in world team

USSR football line-up goalkeeper Rinat Dasayev of Moscow Spartak has been named in an all-world team selected by the popular British "World Soccer"

magazine.
The magazine's oldest observer fric Betty, who compiled the team, writes that the popularity of football in some countries has declined and the current out-standing players, including Da-sayev, should bring spectators back to the stadiums and make football more appealing to the youth

The team named by him also features defenders—Alain Gi-resse of France, Marton Olsen of Denmark, Maxime Bossis of France; midfielders - Alan Simonsen of Denmark, Socrates of Brazil, Jean Tigana and Michel Platini of France, Diego Mara-dona of Argentina; and forwards - Kari-Fleinz Rummenigge of West Germany and Bruno Conti of Italy.

The eight best feams will continue to vie carry in January for the medals of the USSR basketball championship in Moscow and Kaunas. And the outgoing year ended in the thrilling game between the leaders — the Cent-ral Army Club and Kaunas Zal-gitle (see photo) Zalmas Zalgiris (see photo). Zalgiris won

OPINION OF DPRK OLYMPIC COMMITTEE

Seoul is a place in all respects unsuitable for the holding of the 24th Olympic Games, is the opinion of the Olympic Committee of the Democratic People's

Republic of Korea expressed in a letter by its Chairman, Kin Yu Sun, to the IOC President.

The letter circulated by the Chung Yang Tongsin agency, says that Seoul cannot be an areas for a world aparting feet. arena for a world sporting festi-val such as the Olympics which should promote friendship, accord and understanding. South Korea is rather an unstable area over which hangs the perpetual threat of war. American troops and nuclear weapons are in that country and constant was manogurtes are held there.

OF INTEREST

SHARP SHOTS COME TO HELP

Sharp shots lited by candidate master of sport Yuri Komanov eliminated a breakdown in a kiin at the Krasnodar chinaware taclory Chaika.

...In the shop where the warcs are tempered at temperatures above 1,000°C, one of the kilns unexpectedly began to turn out substandard products. Specialists made a "diagnosis": a brick which moved forward a bit from the kiln celling brickwork disrupled the necessary temperature regime. The stopping of the kiln threatened the factory with sub-

Chiet engineer Yuri Komanov came to the assistance. Even for an experienced sportsman the conditions for the performance of the task were very complex—the kiln breathed hot even though the flame in it was turned down a bit. Through the fire curiain Yuti fired ten shots from a small-bore rille and with a jeweller's accuracy chipped off a piece of the brick and then levelled the edge with the brickwork line.

South Korea, the letter further notes, has a rather complicated political situation. College situation. dents, workers, peasants, men of religion and democratic activists are fighting for democratic fre-edom and unification of the nation. Violence and repression are
